#### ANDHRA KESARI UNIVERSITY

## COMMON VALUE-ADDED COURSE

# w.e.f. AY 2023-24

#### **ENVIRONMENTAL EDUCATION**

Credits: 2 2 hrs/week

**Course objective:** A Generic Course intended to create awareness that the life of human beings is an integral part of environment and to inculcate the skills required to protect environment from all sides.

**Learning outcomes:** On completion of this course the students will be able to .....

- 1. Understand the nature, components of an ecosystem and that humans are an integral part of nature.
- 2. Realize the importance of environment, the goods and services of a healthy biodiversity, dependence of humans on environment.
- 3. Evaluate the ways and ill effects of destruction of environment, population explosion on ecosystems and global problems consequent to anthropogenic activities.
- 4. Discuss the laws/ acts made by government to prevent pollution, to protect biodiversity and environment as a whole.
- 5. Acquaint with international agreements and national movements, and realize citizen's role in protecting environment and nature.

#### **Unit 1: Environment and Natural Resources**

06 Hrs.

- 1. Multidisciplinary nature of environmental education; scope and importance.
- 2. Man as an integral product and part of the Nature.
- 3. A brief account of land, forest and waterresources in India and their importance.
- 4. Biodiversity: Definition; importance of Biodiversity ecological, consumptive, productive, social, ethical and moral, aesthetic, and option value.
- 5. Levels of Biodiversity: genetic, species and ecosystem diversity.

# **Unit-2: Environmental degradation and impacts**

## 10Hrs

- 1. Human population growth and its impacts on environment; land use change, land degradation, soil erosion and desertification.
- 2. Use and over-exploitation of surface and ground water, construction of dams, floods, conflicts over water (within India).
- 3. Deforestation: Causes and effects due to expansion of agriculture, firewood, mining, forest fires and building of new habitats.
- 4. Non-renewable energy resources, their utilization and influences.
- 5. A brief account of air, water, soil and noise pollutions; Biological, industrial and solid wastes in urban areas. Human health and economic risks.
- 6. Green house effect global warming; ocean acidification, ozone layer depletion, acid rains and impacts on human communities and agriculture.
- 7. Threats to biodiversity: Natural calamities, habitat destruction and fragmentation, over exploitation, hunting and poaching, introduction of exotic species, pollution, predator and pest control.

#### **Unit 3: Conservation of Environment**

#### 10 Hrs

- 1. Concept of sustainability and sustainable development with judicious use of land, water and forest resources; afforestation.
- 2. Control measures for various types of pollution; use of renewable and alternate sources of energy.
- 3. Solid waste management: Control measures of urban and industrial waste.
- 4. Conservation of biodiversity: In-situ and ex-situ conservation of biodiversity.
- 5. Environment Laws: Environment Protection Act; Act; Wildlife Protection Act; Forest Conservation Act.
- 6. International agreements: Montreal and Kyoto protocols; Environmental movements: Bishnois of Rajasthan, Chipko, Silent valley.

#### **Suggested activities to learner: (4 hours)**

- 1. Visit to an area to document environmental assets: river/ forest/ flora/fauna, etc
- 2. Visit to a local polluted site-Urban/Rural/Industrial/Agricultural site.
- 3. Study of common plants, insects, birds and basic principles of identification.
- 4. Study of simple ecosystems-forest, tank, pond, lake, mangroves etc.
- 5. Case study of a Forest ecosystem or a pond ecosystem.
