M.A. ECONOMICS

Master of Arts (MA) Economics:

A Master of Arts in Economics is a postgraduate degree programme in economics. M.A. in Economics widely and usually focuses on Micro Economics, Macro Economics, Econometric, Public Economics, International, and Financial Economics, with a combination of all parts of Economics in society. The course is a field of science that studies production and consumption and market supply and demand fluctuations. It provides a wide description of resource use in insurance, banking, investments, markets, and many other Economic areas.

The study of wealth generation, distribution, and consumption in a society is the subject of a master's degree in Economics. The M.A. in Economics curriculum focuses on financial and market management concepts and the global economy and financial market diversions. It not only demonstrates how finance works in an economy, but it also qualifies one to confront problems in the field.

The course covers a large portion of Macro Economics, such as price, production, and employment, and Micro Economics, which deals with needs, suppliers, markets, consumer behavior, and other economic issues. The study of Economics revolves around factors that influence every element of a country, from citizens to companies to government and services. Degree holders may find employment in the public or private sectors in the banking, finance, and labor markets.

Programme Objectives:

The Master of Arts programme in Economics has been designed with the objective to develop in-depth knowledge of students in the areas of economic theory and methods, so that they are able to use the knowledge to study real world economic problems. The specific objectives are:

- To equip students with advanced knowledge of Economics,
- Development Issues of Indian Economy in general and Andhra Pradesh Economy in particular,
- Prepare students to develop critical thinking to carry out investigation about various socio-economic issues objectively while bridging the gap between theory and practice,
- Equip the student with skills to analyze problems, formulate a hypothesis, evaluate and validate results and draw reasonable conclusions thereof,
- Prepare students for pursuing research or careers that provide employment through entrepreneurship and innovative methods,
- Prepare students to develop own thinking /opinion regarding current national or international policies and issues, and
- Create awareness to become a rational and an enlightened citizen so that they can take the responsibility to spread the governments' initiatives/schemes to the rural areas for the upliftment of the poor or vulnerable section of the society for inclusive growth.

Programme Outcomes:

At the end of the programme, the students will have adequate competency in the areas of economic theory and methods. The students will acquire additional specialization through optional courses. The Specific outcomes are:

- PO1: To gain comprehensive knowledge and understanding of several disciplines of economics.
- PO2: To impart in-depth knowledge to the student about various economics theories and concepts and enhance capabilities of developing ideas based on them
- PO3: To acquire knowledge in various economic issues and latest developments in the economy
- PO4: To acquire analytical skills through various mathematical and statistical tools applied to economic principles using Information and Communication Technology (ICT) leading to skill enhancement and employability
- PO5: To develop critical thinking among students in various socio-economic issues to bridge the gap between theory and practice.
- PO6: To develop appropriate skills in students catering to the needs of the industry and policy makers

Eligibility Criteria for M.A. in Economics:

The eligibility criteria for admissions through entrance examinations and merit are varied. However, candidates interested in pursuing a master's degree in Economics must meet the M.A. Economics eligibility criteria listed below. Candidates must have completed graduation in Economics or a related branch of study. At the graduate level, a minimum percentage of 50% is necessary.

Benefits of M.A. in Economics:

- Studying this subject may be both entertaining and beneficial. To learn how to consider the following points.
- M.A. Economics provides students with a solid understanding of the topic by emphasizing the importance of increasing demands and limited resources to meet those demands.
- M.A. Economics can lead to a wider range of high-paying employment than other bachelor's degrees. These degree recipients might work in the banking, academic and organizational, government, and investing industries.
- Being certified also opens up the possibility of obtaining a Ph.D. in the same subject.
- Economists are essential since they are in charge of recognizing ongoing structural changes in the market and dealing with an economy's stability and national security.
- This course might also help you go one step closer to becoming a member of the Indian Economic Services.

Future Scope of M.A. in Economics:

- Candidates eager to continue pursuing this can apply for a Ph.D. or M.Phil in Economics or another relevant research subject that could be appealing.
- Advanced-level computation, numerical formulae, statistical procedures, and intellectual abilities are part of this specialist degree. The MA Economics course teaches students how to apply various economic foundations and concepts to real-world problems.
- After earning an M.A. in Economics, you can work in banking and finance, economic consulting, the International Labour Organization, research organizations, and entrepreneurship.
- Actuarial and Data Analysis Education, among other things

Career and Job Opportunities after M.A. in Economics:

Since Economics is so intimately linked to money, markets, and the overall running of a country's economy, M.A. Economics graduates with a good percentage have many opportunities to work as economists in both government and commercial companies.

The scope of Economics is fairly broad and profitable in industries such as banking, insurance, financial services, trade and commerce, and business management.

M.A. in Economics may lead to various difficult job possibilities in sectors that need numerical, analytical, and problem-solving abilities, such as financial management, market research, company planning, budgeting, and resource allocation.

M.A., ECONOMICS
SEMESTER – I
PAPER – I: MICRO ECONOMIC ANALYSIS

Course Name	MICRO ECONOMIC ANALYSIS	L	T	P	C	IM	EM	TM
Course Code	EC 1.1 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

The course is designed to impart theoretical and analytical knowledge to the students for understanding the economic behaviour of individuals, firms and markets. They will learn the various aspects of demand theory, utility theory, theory of production, price and output determination and the choice under uncertainties.

COURSE OBJECTIVES:

- To provide Economics student with a good introduction to the fundamental principles of microeconomics.
- To understand the consumer behavior when changes occurred in Economic variables.
- To get conceptual knowledge of production function and to understand the relationship between factors of production and output.
- To acquire knowledge to determine the profit maximizing price, quantity and minimizing costs under different markets.

COURSE OUTCOMES:

By the end of the course, the student will be able to

1. Get theoretical clarity of economic concepts like static and dynamic, micro and macro and the economic problems of scarcity and choice.
2. Understand the consumer behavioral theories like demand and utility and get clarity on income, price and substitution effects on consumer behavior.
3. Understand the various production technologies and functions and acquire knowledge on the relationship between land, labour, capital and organization with output.
4. Acquire the knowledge of cost and cost functions and profit maximization models.
5. Understand the nature and characteristics of different market structures and farm equilibrium.

M.A., ECONOMICS
SEMESTER – I
PAPER – I: MICRO ECONOMIC ANALYSIS

COURSE DETAILS:-

MODULE – I: INTRODUCTION TO MICROECONOMIC THEORY (8 HOURS)

The Economic Problem: Scarcity and Choice; The scope of Economic theory and Basic Economic Problems; Methods of Economics Analysis; Static and Dynamic Analysis- Micro and Macro differences.

MODULE – II: CONSUMER BEHAVIOUR (12 HOURS)

Basic Concepts: Law of demand – C, Indifference curves, Budget line; Income effects- Price effect and substitution effects – Derivation of demand curve - Slutsky's equation; Revealed preference theory.

MODULE – III: THEORY OF PRODUCTION (10 HOURS)

Basic concepts- Production function ; Linear Programming in production technology- Homogeneous and homothetic production functions; returns to scale, Euler's theorem, Cobb-Douglas, CES, Translog Leontief's Production Functions.

MODULE – IV: COST FUNCTIONS (10 HOURS)

Cost functions- short run and long run; Profit maximization. Baumol's sales revenue maximization model; Williamson's model of managerial discretion. Marris model of managerial enterprise, Bains limit pricing theory.

MODULE – V: MARKET STRUCTURE (10 HOURS)

Markets under perfect competition; market equilibrium; Stability of equilibrium; Dynamic adjustments; Monopoly; Monopsony; Discriminating Monopoly, Monopolistic Competition; Duopoly and Oligopoly- Cournot, Stackelberg, Kinked Demand Curve.

Reading List

1. Koutsoyiannis A. (1979), 'Modern Microeconomics', MacMillan, University of Michigan, USA.
2. Baumol, W.J. (1982), Economic Theory and Operations Analysis, Prentice Hall of India, New Delhi.
3. Green, H.A.G. (1971), Consumer Theory, Penguin, Harmondsworth.
4. Henderson, J.M. and R.E. Quandt (1980), Microeconomic Theory: A Mathematical Approach, McGraw Hill, New Delhi.
5. Da Costa, G.C. (1980), Production, Prices and Distribution, Tata McGraw Hill, New Delhi.
6. Healthfields and Wibe (1987), An Introduction to Cost and Production Functions, Macmillan, London.
7. Hirshleifer, J and A. Glazer (1997), Price Theory and Applications, Prentice Hall of India, New Delhi.
8. Archibald, G.C. (Ed.) (1971), Theory of the Firm, Penguin, Harmondsworth
9. Da Costa, G.C. (1980), Production, Prices and Distribution, Tata McGraw Hill, New Delhi.
10. Hirshleifer, J and A. Glazer (1997), Price Theory and Applications, Prentice Hall of India, New Delhi.
11. Archibald, G.C. (Ed.) (1971), Theory of the Firm, Penguin, Harmondsworth.
12. Bain, J. (1958) Barriers to New Competition, Harvard University Press, Harvard.

M.A. ECONOMICS
SEMESTER – I
PAPER – II: MACRO ECONOMIC ANALYSIS

Course Name	MACRO ECONOMICS	L	T	P	C	IM	EM	TM
Course Code	EC 1.2 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

The course focuses on economic growth and inflation in the long-run. It then turns to models of short-run fluctuations with an emphasis on the role of fiscal and monetary policy. Much of the reading is from original articles in research journals. In addition to studying theoretical models, the course also introduces basic analysis of Macroeconomic data in order to evaluate and test competing models.

COURSE OBJECTIVES:

- ❖ To familiarize the students with the concepts of National Income and classical and Keynesian macro economics
- ❖ To focus on various concepts of consumption function and Investment function
- ❖ To acquire the knowledge about goods market and money market

COURSE OUTCOMES:

- describe the fundamental premises of Macroeconomic aggregates
- consequences of price instability in the process of Economic growth
- evaluate the interrelationship between different sectors of the economy
- consumption and investment decisions in the economy
- analyze the role of government in stabilizing the economy
- analyze the relevance of Keynesian ideas in the current Macroeconomic environment
- understand the contemporary Macroeconomic policies and issues
- analyze and appreciate current Macroeconomic changes in the light of modern macroeconomic theories
- interpret the Neo Economic growth models in parlay with modern Macroeconomic dynamics

M.A. ECONOMICS
SEMESTER – I
PAPER – II: MACRO ECONOMIC ANALYSIS

COURSE DETAILS:-

MODULE – I: NATIONAL INCOME AND ACCOUNTS (10 HOURS)

Circular Flow of Income in two- three-and four-sector economy; Concepts of National Income, Methods of measuring National Income, GNP Deflator, different forms of national income accounting

MODULE – II: CONSUMPTION FUNCTION (10 HOURS)

Determination of output and employment – Classical and Keynes approach; Keynes' Psychological law of consumption – implications of the law; short-run and long-run consumption function; Empirical evidence of consumption function; Income-consumption relationship-absolute income, relative income, life cycle and permanent income hypotheses.

MODULE – III: INVESTMENT FUNCTION (10 HOURS)

Determinants of Investment – Capital and Investment – Accelerator Principle, Marginal Efficiency of Capital – Acceleration.

MODULE – IV: THEORY OF INFLATION (10 HOURS)

Types of inflation, Cost-push and demand pull inflations - Philips curve analysis – Short run and long run Philips Curve; The natural rate of unemployment hypothesis, Adaptive Expectations, Rational Expectations (Ratex Hypothesis)

MODULE – V : BUSINESS CYCLES (12 HOURS)

Theories of Schumpeter, Samuelson, Kaldor's and Hicks, Control of business cycles – relative efficacy of monetary and fiscal policies, Internal and external balance: Mundell Model and Swan model. Supply side economics, New Classical Economics, New Keynesian Economics.

READING LIST:

1. Ackley, G. (1978), Macroeconomics: Theory and Policy, Macmillan, New York.
2. James Froyen: Macroeconomics, McGraw Hill, New York.
3. Edward Shapiro: Macroeconomics, McGraw Hill, New York.
4. Dornbush, R and Stanley, F., 2017, Macro Economics 11th Edition, McGraw Hill Inc., New York.
5. Edward Shapiro, 2013, Macro-economic analysis, Galgotia publications, New Delhi.
6. Branson, W.A. 2005, Macro-economic theory and policy 3 rd Edition, Affiliated East-west Press Pvt Ltd.
7. Jhingan, M.L., 2016, Macro-economic Theory 13th Edition, Vrinda Publications, New Delhi.
8. Ahuja, H.L., 2014, Macro-economics, S. Chand and Company, New Delhi.

M.A., ECONOMICS
SEMESTER – I
PAPER – III, PUBLIC ECONOMICS

Course Name	PUBLIC ECONOMICS	L	T	P	C	IM	EM	TM
Course Code	EC 1.3 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

Public Economics is primarily concerned with the role of government in a market economy. Public economics builds on the theory of welfare economics and is ultimately used as a tool to improve social welfare. Public economics provides a framework for thinking about whether or not the government should participate in economic markets and to what extent it should do so.

COURSE OBJECTIVES:

- To familiarize the student about the major fiscal functions of the government
- To understand the sources of Public Revenue
- To understand concepts of Public Expenditure and Public Debt
- To focus on the functional areas of federal finance in India.

COURSE OUTCOMES:

At the end of this course the students should be able to:

- ✓ Outline the major fiscal functions of the Government and various approaches to public finance
- ✓ Analyse various sources of Public Revenue in general India in particular
- ✓ Understand various concepts of Public Budget and outline the importance of Public expenditure
- ✓ Outline the concept of Public debt and role of public debt in Indian economic development
- ✓ Understand the functional areas of federal finance in India

M.A., ECONOMICS
SEMESTER – I
PAPER – III: PUBLIC ECONOMICS

COURSE CONTENT:-

MODULE – I: INTRODUCTION (12 HOURS)

Role of Government in organized society; Changing perspective – Govt. in a mixed economy; public and private sector, Govt. as an agent for economic planning and development; Govt. as a tool for operationalizing the planning process; private goods, public goods, and merit goods - Principle maximum social advantage.

MODULE – II: PUBLIC REVENUE (10 HOURS)

Sources of Public revenue - Theory of incidence; Alternative concepts of incidence – Allocative and equity aspects of individual taxes; Benefit and ability to pay approaches; Theory of optimal taxation; Excess burden of taxes; Theory of measurement of dead weight losses; The problem of double taxation.

MODULE – III: PUBLIC EXPENDITURE (10 HOURS)

Public Expenditure: Increasing State Activities in modern times - Wagner's Law and Peacock and Wiseman Hypothesis- Recent Trends in the Growth of Public Expenditure - Effects and Regulation of Public Expenditure in India.

MODULE – IV: PUBLIC DEBT (10 HOURS)

Public Debt - Sources of Public Debt - Classification of Public Debt - Debt Burden Controversy- Classical and Keynesian views - Methods of Debt Redemption - Objectives and Principles of Public Debt Management -- Recent Trends in Public Debt in India - Public Debt and Economic Development in India.

MODULE –V: INDIAN PUBLIC FINANCE (10 HOURS)

Indian tax system; Revenue of the Union, States and local bodies; Major taxes in India; base of taxes, direct and indirect taxes, taxation of agriculture, expenditure tax, reforms in direct and indirect taxes, taxes on services; Non-tax revenue of Centre, State and local bodies; Reports of Finance Commissions in India.

READING LIST:

- 1) Tyagi B P, 2015, Public Finance, Chaukhamba Auriyantaliya Publisher
- 2) Om Prakash (2012) Public Economics: Theory and Practice., Vishal Publishing Co. Jalandhar.
- 3) Ambar Ghosh and Chandana Ghosh (2014) Public Finance (2nd Edition) PHI learning Private limited, Delhi.
- 4) H.L.Bhatia (2014), Public Finance, 27th Edn., Vikas Publishing House.
- 5) J.R. Gupta (2007), Public Economics in India, Atlantic Publishers
- 6) Musgrave R.A. and Musgrave P.B., 1976, Public Finance in Theory and Practice, McGraw Hill, Tokyo.
- 7) Chellaiah Raja J., 2013, Fiscal Policy in Underdeveloped Countries with Special Reference to India, George Allen and Unwin, London.
- 8) Chellaiah Raja J. (Ed), 1981, Trends and Issues in India's Federal Finance, National Institute of Public Finance and Policy, New Delhi.
- 9) Lakadawala D.T., 1969, Union State Financial Relations, Lalwani Publishers House, Mumbai.
- 10) R.B.I. Monthly Bulletins.
- 11) CMIE Monthly Publications.
- 12) Economic Surveys, Government of India, New Delhi.

M.A., ECONOMICS
SEMESTER – I
PAPER – IV: MATHEMATICAL METHODS IN ECONOMICS

Course Name	MATHEMATICAL METHODS	L	T	P	C	IM	EM	TM
Course Code	EC 1.4 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

The course is planned to build the mathematical practicalities of the students by equipping them with fundamental mathematical methods that are essential for learning and working with economic theories and models. This course also introduces the Mathematical tools such as Basic Algebra, Sets operations, functions which is more important in economic functional relations, differential equations and Matrices and Determinants.

COURSE OBJECTIVES:

- To get basic knowledge of different mathematical concepts of functions and limits to apply to various micro economic theorems. .
- To get understand the meaning and usage of matrices and their application to inter dependences between economic sectors.
- To get familiarize interpretation of calculus to various economic concepts.
- To get knowledge of optimal solution in the calculation of profit and loss through mathematical concepts.

COURSE OUTCOMES:

1. To understand the significance of mathematical functions in economics.
2. To know role of differentiation in theory of demand and supply, indifference curve, cost and revenue of functions in various markets.
3. To know the maxima and minima of the production and market equilibrium and role of integration in the concept of consumer and producer surplus.
4. To understand the significance of matrices and determinants in economics.
5. To know the application of linear programming in economics.

M.A., ECONOMICS
SEMESTER – I
PAPER – IV: MATHEMATICAL METHODS IN ECONOMICS

COURSE DETAILS:-

MODULE – I: CONCEPTS OF FUNCTIONS AND LIMITS (8 HOURS)

Concept of Function, Types of Functions - Graphical Representation of function - Limit and continuity of a function - Concept of Straight line, Circle and Parabola - Applications in Economics.

MODULE – II: DIFFERENTIATION OF FUNCTIONS OF ONE OR TWO VARIABLES (12 HOURS)

Concept of derivative - Rules of differentiation - Interpretation of revenue, cost, demand, supply, functions; Elasticities and their types; Multivariable functions; Concept and types of production functions.

MODULE – III: MAXIMUM AND MINIMUM FUNCTIONS AND INTEGRATION (12 HOURS)

Rules of partial differentiation; Problems of maxima and minima in single and multiple variables; Simple problems in market equilibrium; Total derivatives, Indifference curve analysis etc., Concept of integration; Simple rules of integration; Application to consumer's surplus and producer's surplus.

MODULE – IV: MATRICES AND DETERMINANT (8 HOURS)

Matrix Theory and Input-Output analysis; Meaning-Types-Assumptions; Review exercises.

MODULE – V: LINEAR PROGRAMMING AND INPUT-OUTPUT ANALYSIS (10 HOURS)

Linear programming - Basic concepts; Formulation of linear programming problem - its structure and variables; Solutions of linear programming through graphical and simplex method.

READING LIST:

1. Vohara, Quantitative Techniques, Tata McGraw Hill, 2nd ed., 2001.
2. D.C.Sancheti and V.K.Kapoor, Business Mathematics.
3. S.C. Gupta Fundamentals of statistics.
4. K.Chandra Sekhar, Business of statistics.

M.A., ECONOMICS
SEMESTER – I
PAPER – V: FUNDAENTALS OF COMPUTERS

Course Name	FUNDAENTALS OF COMPUTERS	L	T	P	C	IM	EM	TM
Course Code	EC 1.5 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

Computer software is used for a wide range of purposes in economics including the simulation of theoretical models, hypothesis testing, data exploration and analysis, and for the presentation of results through various media such as print, screen and web sites. The aim of this course is to enable students to develop their capacity for applying basic software skills in their study of economics and related disciplines. The unit is based on a mixture of demonstrations of the application of computing in economics and practical sessions in which students develop their own skills both individually and as a group.

COURSE OBJECTIVES:

- ❖ The basic objective of course is to introduce the students with financial and statistical functions of MS – Excel, MS – Access and SPSS.
- ❖ Know about the basic concepts and peripheral devices of computer system.
- ❖ Review various types of operating System and networking concepts to better understand the functioning of computer system.
- ❖ Explain database concepts and programming languages to handle and process the data
- ❖ Examine the advance software such as SPSS for computing, store, and process the data.

COURSE OUTCOMES:

At the end of this course the students should be able to:

- Outline the components and fundamentals of the computer
- Demonstrate various techniques of MS Word application.
- Apply the skill of presenting the statistical data in Excel application
- Demonstrate various techniques of MS PowerPoint and MS Access.
- Apply to economics a range of software products including: word processing (MS word), presentation software (Power point), spreadsheets (Excel) and a specialist econometric package (E-views).
- Build small spreadsheet models for analyzing economic relationships
- Evaluate various descriptive statistical approaches and learn about the practical side of statistical analysis using specialist statistical software

M.A., ECONOMICS
SEMESTER – I
PAPER – V: FUNDAMENTALS OF COMPUTERS

COURSE DETAILS:-

MODULE – I: INFORMATION CONCEPT & COMPUTER FUNDAMENTALS (8 HOURS)

Computer Fundamentals Components of a Computer – Elements of a digital computer system(components), CPU and its functions–Block Diagram–Evolution of Computer Generations–Input–Output Devices–Hardware and Software–Compilers and Assemblers–Low level and High level Languages–Types of memory and memory devices; Software concepts; Types of software-system/application, Operating Systems and the User Interface – Microsoft Operating Systems.

MODULE – II: OPERATING SYSTEM AND BASICS OF MS OFFICE (12 HOURS)

Operating System-salient Features-Merits of Windows Operating System-Accessories-System tools-Scan Disk-Word Pad-Note Pad-Paint-Windows Explore-My Documents-My computer-Internal Explorer-Network Neighborhood. *Ms-Word*: Creating, Opening and saving files-editing and formatting text-spell and grammar check-auto corrects-creation of tables and volumes – Mail-merge – Concept of Macro. *MS-Excel*: Work sheet-entering data and creating work sheets and work book opening and formatting. *MS Access*: Creating New Database Files-Fields – Records– Files-forms-Query and reports. *MS-Power Point*: concept of presentation-creating, opening and saving the slide shows-animation-viewer's presentation.

MODULE – III: DATA PROCESSING TECHNIQUES USING MS EXCEL (12 HOURS)

Work Sheet–Creating a Data File in MS Excel – Calculations in Excel Sheet–Creating Tables, Graphs and Charts- Data Base Operations in Excel: Sorting and Filtering–Statistical Functions– Printing Operations. Estimation of Descriptive Statistics, Index Numbers and Growth Rates, Demand function, Supply function, Production function, Consumption function, Employment Function, Demand for Money function, Supply of Money function.

MODULE – IV: INTERNET APPLICATIONS (8 HOURS)

Definition and uses of Internet-Salient features- browsers-Creation of Electronic Mail address-Sending and getting e-mails-Features of Inbox-Attaching Images or Documents to E-mail-Downloading e-mail-Attachments of Documents. Downloading Economic surveys and the Internet-data related to Economics and important Government Websites. www.rbi.org.in .

MODULE – V: DATA ANALYSIS USING SPSS (12 HOURS)

Data Entry in SPSS-computing with SPSS; Basics of Data Management - Importing data – Recoding Variables, split file, select cases, weight cases; Basics of Data Analysis- Reports, Descriptive-Statistics, Compare Means, time Series Analysis, Correlation and Regression Models. Non-parametric tests: X^2 , Phi, Cromers-V, Reliability statistics

READING LIST:

1. Ravichandran, D., 2001, Introduction to Computers and Communication, Tata McGraw Hill Publishing Company Limited, New Delhi.
2. Sanjay Sexena, 2010, A First Course in Computers, Vikas Publishing House, New Delhi.
3. Shelly and Hunt, 1988 Computers and Common Sense, 3rd Edition Prentice Hall of India, New Delhi.
4. Sudalaimuthu, S. 2015. Computer Applications in Business. Himalaya Publishing House.
5. Reema Thareja, 2014. Fundamentals of Computers, OUP India.
6. Norton 2017. Introduction to Computers. 7th Edition TMH Publishing Company Limited, New Delhi.

M.A., ECONOMICS
SEMESTER – I
PAPER –VI: PERSONALITY DEVELOPMENT THROUGH LIFE ENLIGHTENMENT
SKILLS

Course Name	PERSONALITY DEVELOPMENT THROUGH LIFE ENLIGHTENMENT SKILLS	L	T	P	C	IM	EM	TM
Course Code	EC 1.6 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

Personality development is the development of your behavior patterns and attitude. It is the result of where we are born, the circle we interact with and our personal temperament. Every person is different. There are some characteristics traits that make you unique. Personality development through life enlightenment course aims to help students identify negative behaviors which may be stopping them from reaching their desired goals. This course will help students both in their personal and desired professional life. The other purposes of personality development through life enlightenment course are to enable you lead stress-free and healthier life, ethical decision making ability, enhanced confidence level, and building a more pleasing personality.

COURSE OBJECTIVES:

The Course will introduce the students to

- 1) Learn to achieve the highest goal happily.
- 2) Become a person with stable mind, pleasing personality and determination.
- 3) Learn to build positive attitude, self-motivation, enhancing self-esteem and emotional intelligence
- 4) Learn to Body language - Problem-solving - Conflict and Stress Management
- 5) Resume building- The art of participating in Group Discussion.

COURSE OUTCOMES:

At the end of this course the students should be able to:

- Develop their personality and achieve their highest goals of life.
- Lead the nation and mankind to peace and prosperity
- Practice emotional self regulation.
- Develop a positive approach to work and duties
- Develop a versatile personality

M.A., ECONOMICS
SEMESTER – I
PAPER – VI: PERSONALITY DEVELOPMENT THROUGH LIFE
ENLIGHTENMENT SKILLS

CORSE DETAILS:-

MODULE – I: INTRODUCTION TO PERSONALITY DEVELOPMENT (12 HOURS)

The concept of personality - Dimensions of personality – Theories of Freud & Erickson- Significance of personality development. The concept of success and failure: What is success? - Hurdles in achieving success - Overcoming hurdles - Factors responsible for success – What is failure - Causes of failure. SWOT analysis.

MODULE – II: ATTITUDE & MOTIVATION (10 HOURS)

Attitude - Concept - Significance - Factors affecting attitudes - Positive attitude – Advantages –Negative attitude- Disadvantages - Ways to develop positive attitude - Differences between personalities having positive and negative attitude. Concept of motivation - Significance – Internal and external motives - Importance of self- motivation- Factors leading to de-motivation.

MODULE – III: SELF-ESTEEM (10 HOURS)

Term self-esteem - Symptoms - Advantages - Do's and Don'ts to develop positive self-esteem – Low self- esteem - Symptoms - Personality having low self esteem - Positive and negative self esteem. Interpersonal Relationships – Defining the difference between aggressive, submissive and assertive behaviors - Lateral thinking.

MODULE – IV: OTHER ASPECTS OF PERSONALITY DEVELOPMENT (10 HOURS)

Body language - Problem-solving - Conflict and Stress Management - Decision-making skills - Leadership and qualities of a successful leader – Character building -Team-work – Time management - Work ethics –Good manners and etiquette.

MODULE – V: EMPLOYABILITY QUOTIENT (10 HOURS)

Resume building- The art of participating in Group Discussion – Facing the Personal (HR & Technical) Interview -Frequently Asked Questions - Psychometric Analysis - Mock Interview Sessions.

READING LIST:

1. Andrews, Sudhir. How to Succeed at Interviews. 21st (rep.) New Delhi. Tata McGraw-Hill 1988.
2. Heller, Robert. Effective leadership. Essential Manager Series. Dk Publishing, 2002
3. Hindle, Tim. Reducing Stress. Essential Manager Series. Dk Publishing, 2003
4. Lucas, Stephen. Art of Public Speaking. New Delhi. Tata - Mc-Graw Hill. 2001
5. Mile, D.J Power of positive thinking. Delhi. Rohan Book Company, (2004).
6. Pravesh Kumar. All about Self- Motivation. New Delhi. Goodwill Publishing House. 2005.
7. Smith, B . Body Language. Delhi: Rohan Book Company. 2004
8. Hurlock, E.B (2006). Personality Development, 28th Reprint. New Delhi: Tata McGraw Hill.
9. Stephen P. Robbins and Timothy A. Judge(2014), *Organizational Behavior 16th Edition*: Prentice Hall.

M.A., ECONOMICS
SEMESTER – II
PAPER – I: THEORY OF DISTRIBUTION AND WELFARE ECONOMICS

Course Name	THEORY OF DISTRIBUTION AND WELFARE ECONOMICS	L	T	P	C	IM	EM	TM
Course Code	EC 2.1 (NR)	4	0	0	4	30	70	100

COURSE DESCRIPTION AND PURPOSE:

The Course deals with laws underlying the determination of Factor Shares, General Equilibrium and Welfare Economics. Welfare Economics is the framework within which the normative significance of Economic events is evaluated. It serves as a foundation to many applied branches of Economics such as Public Finance, Cost-Benefit Analysis and Economics of Government Policy. Welfare Economics is considered as a Half-Way House between Microeconomics and Macroeconomics.

COURSE OBJECTIVES:

- To provide economics student with a good introduction to the fundamental principles of microeconomics.
- To understand the consumer behavior when changes occurred in economic variables.
- To get conceptual knowledge of production function and to understand the relationship between factors of production and output.
- To acquire knowledge to determine the profit maximizing price, quantity and minimizing costs under different markets.

COURSE OUTCOMES:

By the end of the course, the student will be able to

1. Get theoretical clarity of economic concepts like static and dynamic, micro and macro and the economic problems of scarcity and choice.
2. Understand the consumer behavioral theories like demand and utility and get clarity on income, price and substitution effects on consumer behavior.
3. Understand the various production technologies and functions and acquire knowledge on the relationship between land, labour, capital and organization with output.
4. Acquire the knowledge of cost and cost functions and profit maximization models.
5. Understand the nature and characteristics of different market structures and farm equilibrium.

M.A., ECONOMICS
SEMESTER – II
PAPER – I: THEORY OF DISTRIBUTION AND WELFARE ECONOMICS

COURSE DETAILS:-

MODULE – I: THEORY OF DISTRIBUTION (12 HOURS)

Neo-classical approach- Marginal Productivity theory; Product exhaustion theorem; Elasticity of technical substitution, technical progress and factor shares; Theory of distribution in imperfect product and factor markets; Determination of rent, wages, interest and profit, macro theories of distribution Ricardian, Marxian, Kaleclla and Kaldor's

MODULE – II: PRE PARETIAN WELFARE ECONOMICS (12 HOURS)

Welfare Economics: Nature and Scope; Economic and General Welfare; Value Judgments; Positive Economics and Welfare Economics; Benthamite Approach to Aggregate Welfare; Optimum Resource Allocation and Welfare Maximization.

MODULE – III. GENERAL EQUILIBRIUM THEORY(10 HOURS)

Partial and General Equilibrium; Stability and Uniqueness of General Equilibrium; Coalitions and Monopolies; The Walrasian General Equilibrium Model; 2x2x2 Graphical General Equilibrium Model

MODULE – IV: THE NEO-CLASSICAL (PIGOVIAN) WELFARE ECONOMICS AND EXTERNALITIES(10 HOURS)

Pigovian Welfare Economics and Externalities – Meaning, Welfare Conditions – Externalities between private and social costs and returns; Pigo's ideal output.

MODULE – V: NEW WELFARE ECONOMICS (10 HOURS)

Introduction; The Optimum Conditions of Exchange; Factor Substitution and Degree of Specialization; The Condition of Optimum Factor-Product Utilization; Pareto Optimality and Perfect Competition; The Social Welfare Function (Bergson and Sameulson). Maximization of Social Welfare; The Theory of second best; Value judgments and welfare economics; Arrow's Possibility Theorem; Political aspects of Welfare Economics.

READING LIST:

1. Bronfenbrenner, M. (1979), Income Distribution Theory, Macmillan, London.
2. Hirshleifer, J. and A. Glazer (1997), Price Theory and Applications, Prentice Hall of India, New Delhi.
3. Broadway, R.W. and N. Bruce (1984), Welfare Economics, Basil Blackwell, London.
4. Graff, J. De V. (1957), Theoretical Welfare Economics, Cambridge University Press, Cambridge.
5. Henderson, J.M. and R.E. Quandt (1980), Microeconomic Theory : A Mathematical Approach, McGraw Hill, New Delhi.
6. Da Costa, G.C. (1980), Production, Prices and Distribution, Tata McGraw Hill, New Delhi.
7. Green, H. and V.Walsh (1975), Classical and Neo-Classical Theories of General Equilibrium, Oxford University Press, London.
8. Hansen, B. (1970), A Survey of General Equilibrium Systems, McGraw Hill, New York.
9. Arrow, K.J. and M.D. Iantrilligator (Eds.) (1981), Handbook of Mathematical Economics, Vol.1, North Holland, Amsterdam.
10. Borch, K.H. (1968), The Economics of Uncertainty, Princeton University Press, Princeton.
11. Diamond and Rothschild (Eds.) (1978), Uncertainty in Economics, Academic Press, New York.

M.A., ECONOMICS
SEMESTER – II
PAPER – II: MONETARY ECONOMICS

Course Name	MONETARY ECONOMICS	L	T	P	C	IM	EM	TM
Course Code	EC 2.2 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

Monetary economics is the branch of Economics that deals with the study of the behavior and performance of the economy in total. This course focuses on demand for and supply of money. It then turns to theories of inflation and macroeconomic policies.

COURSE OBJECTIVES:

- To familiarize the students with various theories of demand for money
- To focus on components of money supply and changes in money supply
- To understand various theories business cycle and theories of inflation
- To familiarize the importance of monetary and fiscal policies in economic development

COURSE OUTCOMES:

Through this course students should be able to

- understand the contemporary macroeconomic policies and issues
- Introduces students to macroeconomic knowledge about policy decision making in central banks, finance ministries or international financial institutions.
- Introduces principles of advanced macroeconomic theory that are applied in monetary and fiscal policy decisions.
- analyze and appreciate current macroeconomic changes in the light of modern macroeconomic theories

M.A., ECONOMICS
SEMESTER – II
PAPER – II: MONETARY ECONOMICS

COURSE DETAILS:-

MODULE – I : SUPPLY OF MONEY (10 HOURS)

Functions of Money – Determinants of money supply; RBI approach to money supply; High powered money and money multiplier; control of money supply.

MODULE – II : DEMAND FOR MONEY (10 HOURS)

The classical view, quantity theory of money, Keynes's liquidity preference approach to demand for money – *Aggregate* demand for money; Post Keynesian Theories of Demand for Money – Tobin, Boumol, Friedman. Integration of monetary theory and value theory: Keynes and Pantinckin

MODULE – III: MONEY MARKET EQUILIBRIUM AND IS-LM MODEL (10 HOURS)

Equilibrium in money market – Equilibrium in product market – Derivation of LM Curve and IS Curve – General Equilibrium.

MODULE – IV: BANKING (10 HOURS)

RBI and its functions – Methods of Credit Control – Reserve Bank of India and Monetary Policy – Objectives and Limitations. Objectives and functions of Commercial Banks – Money Market and Role of Commercial Banks – Nationalization and Privatization of Commercial Banks.

MODULE – V: MONETARY SECTOR REFORMS IN INDIA (10 HOURS)

Banking Sector Reforms – Chakravarthy Committee Report – Narasimham Committee Report. Recent trends in banking sector: Merger of banks, Foreign banks, e-banking/ online banking, UPI, Recapitalization of banks.

READING LIST:

1. James Froyen: Macroeconomics, McGraw Hill, New York.
2. Ackley, G. (1978), Macroeconomics: Theory and Policy, Macmillan, New York.
3. Dornbush, R and Stanley, F., 2017, Macro Economics 11th Edition, McGraw Hill Inc., New York.
4. Keynes, J.M., 1936, General theory of employment interest and money.
5. Edward Shapiro, 2013, Macro-economic analysis, Galgotia publications, New Delhi.
6. Branson, W.A. 2005, Macro-economic theory and policy 3 rd Edition, Affiliated East-west Press Pvt Ltd.
7. Jhingan, M.L., 2016, Macro-economic Theory 13th Edition, Vrinda Publications, New Delhi.
8. Ahuja, H.L., 2014, Macro-economics, S. Chand and Company, New Delhi.
9. Vaish, M.C., 2009, Macro-economics, Vikas Publications.
10. Seth, M.L. 2017, Macro-economic theory, Lakshmi Narai Agarwal Publications, Agra.

M.A., ECONOMICS
SEMESTER – II
PAPER – III: FEDERAL FINANCE

Course Name	FEDERAL FINANCE	L	T	P	C	IM	EM	TM
Course Code	EC-2.3 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

Public Economics is primarily concerned with the role of government in a market economy. Public economics builds on the theory of welfare economics and is ultimately used as a tool to improve social welfare. Federal Finance provides a framework for thinking about whether or not the government should participate in economic markets and to what extent it should do so.

COURSE OBJECTIVES:

- To familiarize the student about the major fiscal functions of the government
- To understand the sources of Budget concept
- To understand concepts of central – state financial relations
- To focus on the functional areas of federal finance in India.

COURSE OUTCOMES:

At the end of this course the students should be able to:

- ✓ Outline the major fiscal functions of the Government and various approaches to public finance
- ✓ Analyse various sources of Public Budget preparation in general India in particular
- ✓ Understand various concepts of Public Budget and outline the importance of Public expenditure
- ✓ Outline the concept of central – state financial relations in Indian economic development
- ✓ Understand the functional areas of federal finance in India

M.A., ECONOMICS
SEMESTER – II
PAPER – III: FEDERAL FINANCE

COURSE DETAILS:-

MODULE – I: BUDGET (10 HOURS)

Meaning, Revenue and Capital Budget- Surplus, Deficit and Balance Budget- Preparation of India Central Budget; Concept of Deficit- Revenue, Fiscal, Primary; Deficit Financing- Meaning, Objectives and Causes; Deficit Finance since 1991, Effects of Deficit Financing.

MODULE – II: CENTRAL – STATE FINANCIAL RELATIONS (10 HOURS)

Sources of Income – Expenditure of the Central Government – Introduction of State finance source of revenue – Expenditure of State Governments.

MODULE – III: FINANCE COMMISSIONS AND RESOURCE ALLOCATION (10 HOURS)

Resource mobilization – Revenue allocation under various finance commissions – Main Recommendations of Finance Commissions – Anomalies of Union – State Financial Relations – Financial autonomy – Sarkaria Commission report on Financial Relations.

MODULE – IV: GOVERNMENT ACCOUNTING AND AUDIT; FINANCIAL CONTROL (12 HOURS)

Nature, Purpose and Objectives of Government Accounting – Meaning and Types of Audit- Functions of Audit department- Separation of Accounts from Audit - Comptroller and Auditor General of India (CAG). Union Finance Ministry Structure, Functions and Role Delegation of Financial Powers- Financial adviser- Parliamentary financial control in India- Public accounts committee- Origin composition functions and role

MODULE – V: FISCAL POLICY AND FISCAL REFORMS IN INDIA (10 HOURS)

Tradition and modern view of fiscal policy – Instruments – Automatic stabilizer – Compensatory fiscal policy and inflation – Effectiveness of fiscal policy – fiscal policy in India – Long term fiscal policy – Impact fiscal reforms on Economic Development.

READING LIST:

M.A., ECONOMICS
SEMESTER – II
PAPER – IV: INTERNATIONAL TRADE: THEORY AND POLICY

Course Name	INTERNATIONAL TRADE: THEORY AND POLICY	L	T	P	C	IM	EM	TM
Course Code	EC 2.4 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-InternalMarks, EM-ExternalMarks, TM-TotalMarks

COURSE DESCRIPTION AND PURPOSE:

The course provides a deep understanding about the broad principles and theories, which tend to govern the free flow of trade in goods, services and capital both short terms and long term at the global level. Besides, preparing the students about the relevance and limitations of these principles and lay stress on the theory and nature of the subject which, in turn, will greatly help them to examine the impact of the trade policies followed both at the national and international levels as also their welfare implications at macro level.

COURSE OBJECTIVE:

The course aims to provide an understanding of the underlying premises of international trade and capital flows. It aims to focus on the trade policies and institutions shaping global trade and capital flows within a broader historical and theoretical context.

This course introduces students to the principle issues of international trade. The course begins with a brief comparison of the economic status and performance among major trading nations. The course then examines alternative trade theories, protectionism, trade restrictions. Trade policies, trade liberalization, free trade agreements, and labor and capital migration. The course examines international finance, including exchange rates, interest.

COURSE OUTCOMES:

1. To familiarize the theories of international trade.
2. To understand the international trade theories under imperfect competition.
3. To explain the terms of trade and gains from trade.
4. To understand the theories of trade policy.
5. To know the importance of international institution for economic integration.

M.A., ECONOMICS
SEMESTER – II
PAPER – IV: INTERNATIONAL TRADE: THEORY AND POLICY

COURSE DETAILS:-

MODULE – I: THEORY OF INTERNATIONAL TRADE (10 HOURS)

Meaning and Importance of International Trade – Silent Features of International Trade – The pure theory of International Trade – Theories of Absolute Advantage, Comparative Advantage and Relatively Costs, Heckscher – Ohlin Theory of International Trade.

MODULE – II: MEASUREMENT OF GAINS (10 HOURS)

Measurement of Gains from Trade and Distribution – Concepts of Terms of Trade, their uses and limitations – Hypothesis of Secular Deterioration of Terms of Trade.

MODULE – III: THEORY OF INTERVENTIONS (10 HOURS)

The Theory of Interventions – Tariffs, Quotas and Non-tariff barriers – Economic Effects of Tariffs and Quotas on National Income, Output and Employment.

MODULE – IV: BALANCE OF PAYMENTS (10 HOURS)

Meaning and Components of Balance of Payments – Equilibrium and disequilibrium in Balance of Payments – The process of adjustment of balance of payments – Foreign Trade multiplier with and without foreign representation and determination of national income and output – Relative merits and demerits of fixed and flexible exchange rates.

MODULE –V: INTERNATIONAL FINANCIAL INSTITUTIONS (10 HOURS)

International Monetary Fund (IMF) – The World Bank (IBRD) – International Finance Corporation (IFC) – International Development Association (IDA) International Organisations- G-20, G-15, BIMSTEC, OPEC, NAFTA, OECD, Working and Regulations of MNCs in India

READING LIST:

1. Dominic Salvatore, (2016), International Economics, Wiley
2. Krugman.P.R, and Obstfeld (2006): International Economics, Addison Wesley, USA.
3. Cherunilam.F (2016) International Economics, The McGraw-Hill, New Delhi
4. Soderston, Bo (1991), International Economics, The Macmillan Press Ltd., London.
5. Bhagwati, J. (Ed.) (1981), International Trade, Selected Readings, Cambridge, University Press, Massachusetts.
6. Kindleberger, C.P.(1973), International Economics, R.D.Irwin, Homewood.
7. Carbaugh, R.J.(1999), International Economics, International Thompson Publishing, New York.
8. Dana, M.S.(2000), International Economics; Study, Guide and Work Book (5th Edition), Routledge Publishers, London.
9. Carbaugh, International Economics, 9th Edition, 2004.

M.A., ECONOMICS
SEMESTER – II
PAPER – V: STATISTICAL METHODS IN ECONOMICS

Course Name	STATISTICAL METHODS IN ECONOMICS	L	T	P	C	IM	EM	TM
Course Code	EC 2.5 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-InternalMarks, EM-ExternalMarks, TM-TotalMarks

COURSE DESCRIPTION AND PURPOSE:

Economics has become more and more analytic over the years, requiring sufficient knowledge of quantitative methods. To meet this requirement, a course in Statistics for Economics is absolutely essential. This course will help the student in data collection, presentation, analyses and drawing inferences about various statistical hypotheses. Further, it helps to develop the analytical skills in the student.

COURSE OBJECTIVES:

The main objective of this study programme is thus to promote the analytical skills of the practical knowledge of calculating descriptive statistics. These knowledge scan be used to solve complex analytical tasks based on statistical analysis of the underlying socio-economic data. To solve the tasks of formulating and estimating economic models using statistical methods such as Correlation and Regression. This course an underlying of practical knowledge of Probability, and Testing of Hypothesis.

COURSE OUTCOMES:

1. To familiarized the basic statistical techniques.
2. To understand the concepts of correlation and regression.
3. To understand the addition, multiplication theorem, conditional probability.
4. To explain the concepts of sampling and hypothesis testing.
5. To know the method of construction index numbers.

M.A., ECONOMICS
SEMESTER – II
PAPER – V: STATISTICAL METHODS IN ECONOMICS

CORSE CONTENT:-

MODULE – I : SAMPLING METHODS (10 HOURS)

Concept of sampling - random and non-random sampling; Simple random; Stratified random, systematic sampling, cluster sampling and non-random sampling methods.

MODULE – II: CORRELATION AND REGRESSION (10 HOURS)

Correlation and regression analysis and their properties; Concept of the least squares and the lines of regression and applications.

MODULE – III: TIME SERIES ANALYSIS AND INDEX NUMBERS (12 HOURS)

Introduction - components - measurement of trend - graphic, (Free hand curve fitting) method, method of semi average, method of moving average, method of curve fitting by principle of least squares. Concept of Index Numbers–Uses and Construction of Index Numbers–Simple and Weighted Index Numbers – Laspeyer’s, Paasche’s and Fisher’s Methods - Tests for Ideal Index

MODULE – IV: PROBABILITY AND THEORETICAL DISTRIBUTIONS (12 HOURS)

Deterministic and non-deterministic relationships - Probability defined - Theorems of probability - Conditional probability - inverse probability - Joint. Binomial Distribution and Poisson Distribution - Assumptions constants - Normal Distribution - properties of normal distribution, constants of normal distribution - Review Exercises.

MODULE – V: STATISTICAL INFERENCE (10 HOURS)

Formulation of statistical hypotheses - Null and alternative; Criteria for testing of hypothesis - Hypothesis testing based on Z, t (Chi-square) and F tests; Type 1 and Type 2 errors.

READING LIST:

1. S.C. Gupta, 2018, Fundamentals of statistics, Himalaya Publications
2. K.Chandra Sekhar, Business of statistics.
3. K.V.Sarma, Statistics made simple, Prentice Hall of India.
4. V.K.kapoor, 2010 Fundamentals of Statistics, Sultan chand & sons

M.A. ECONOMICS
SEMSTER – II
PAPER – VI: DEVELOPMENT OF ECONOMIC THOUGHT

Course Name	DEVELOPMENT OF ECONOMIC THOUGHT	L	T	P	C	IM	EM	TM
Course Code	EC 2.6 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-InternalMarks, EM-ExternalMarks, TM-TotalMarks

COURSE DESCRIPTION AND PURPOSE:

This course will trace the evolution of economic thinking from the scholastics through the early twentieth century. Major groups and thinkers covered include the Scholastics, the Mercantilists, the Physiocrats, Adam Smith, Thomas Malthus, David Ricardo, Karl Marx and Friedrich Engels, the early Marginalists, Alfred Marshall, John Maynard Keynes, F.A. Hayek and covered from Kautilya to Gandhan thoughts in Indian doctrine.

COURSE OBJECTIVES:

The subject of History of Economic Thought covers the economic theories of the

- Past and their evolution and development till the present.
- The study of economic ideas of the past is not only challenging but also enlightening.
- The paper attempts to make the students of economics acquainted with the evolution of economic ideas as a response to immediate economic problems and policy issues, refining earlier analysis by correcting mistakes and filling in the gaps in the analysis.
- The subject has shown rapid progress right from the beginning and is showing constant development in the present also..

COURSE OUTCOMES:

This course would enable the student to understand how contemporary economics has taken the present shape.

1. Explains the views of classical and modern economists.
2. Discusses about the various theories of economics.
3. Applies the economic theories practically in an economy.
4. Compares the classical and modern theories of economic thought.
5. Examines the classical and modern theories of Indian school of economic thought.

M.A. ECONOMICS
SEMSTER – II
PAPER – VI: DEVELOPMENT OF ECONOMIC THOUGHT

CORSE CONTENT:-

MODULE – I: THE EARLY PERIOD (10 HOURS)

Ancient Doctrines: The Old Testament; Greek Philosophers; Plato and Aristotle; Roman Empire and Christianity; Middle Ages; The Doctrine of the Church; Modern Period; Mercantilism; Physiocracy

MODULE – II: CLASSICAL ECONOMIC THOUGHTS (10 HOURS)

Adam Smith- value theory-TR.Malthus- the economics of exchange and Class conflict Theory of Gluts- David Ricardo- The theory of rent and first approach to profit, J S Mill: Theory of Value, Views on Production and Distribution. Classical Stationary State with special reference to Mill's views. The Classical School- Adam Smith; Ricardo; Malthus; Say's Law of Markets; Muller; Socialists; Sismond; Marx; Other contributions; a) The Historical School and b) Say, Cournout, Thunen, Senior, J.S. Mill

MODULE –III: THE LATER PERIOD (10 HOURS)

Economic ideas of Jevons, Menger and Walras.Pareto, Fisher, Neoclassical theory of the firm and income distribution: Marshal's contribution to utility theory. Clark and Marginal Productivity theory of distribution.

MODULE – VI: POST MARSHALL DOCTRINES (10 HOURS)

Pigou, Keynes and Schumpeter; Basic Doctrines; Veblen Institutionalism.

MODULE – V: INDIAN ECONOMIC THOUGHT (10 HOURS)

Early economic ideas: Kautilya, Valluvar – Modern economic ideas: Naroji, Ranade and M.N.Roy – Economic ideas of Gandhi: Early approaches to planning- cooperation as a strategy– Economic thoughts of Dr.Ambedkar. Contributions of AmartyaSen.

READING LIST:

M.A., ECONOMICS
SEMESTER – III
PAPER – I: ECONOMICS OF GROWTH AND DEVELOPMENT

Course Name	ECONOMICS OF GROWTH AND DEVELOPMENT	L	T	P	C	IM	EM	TM
Course Code	EC 3.1 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-InternalMarks, EM-ExternalMarks, TM-TotalMarks

COURSE DESCRIPTION AND PURPOSE:

Economic development is of universal importance and its study is gaining lot of prominence in the present day world. Economic Development is in the interest of both rich and poor countries. For developed nations, the study is crucial for overcoming the problem of secular stagnation where as for the developing countries; the study is essential to break the vicious circle of poverty. While a few success stories can be counted, many have grappled with the chronic problems like poverty and insecurity, unemployment, poor health, environmental pollution etc. The modules deal exclusively with various theories of development - from Adam smith to endogenous growth models and throw light on several of development approaches.

COURSE OBJECTIVES:

The main objective of course is introducing students to the theories of economic growth and development, policies of development economics and to extend their ability to apply the theories to explain real world cases. Specific goal of this course is to prepare students to know the reasons for persistence in underdevelopment and what causes or promotes the development.

COURSE OUTCOMES:

On completion of this course

1. Students should be able to obtain a basic understanding of the issues and on-going debates on development economics.
2. Students will be able discuss the important models and theories in economic development and their policy implications.
3. This course will enable the students in identifying and evaluating the unevenness in development.

M.A., ECONOMICS
SEMESTER – III
PAPER – I: ECONOMICS OF GROWTH AND DEVELOPMENT

COURSE CONTENT:-

MODULE – I: DEVELOPMENT AND PLANNING (10 HOURS)

Economic Growth--Economic Development and Sustainable Development- Importance of Institutions- Government and markets- Perpetuation of Underdevelopment- Vicious circle of poverty. Indicators and measurement of poverty structural view of underdevelopment – measurement of development; conventional, HDI and quality of life indices

MODULE – II: TRADITIONAL ECONOMIC GROWTH MODELS (10 HOURS)

Economic Growth: Harrod-domar model, instability of equilibrium, Neoclassical growth- Solo's model, steady state growth, Mrs Joan Robinson's growth model; Growth model of Kaldor.

MODULE – III: CLASSICAL THEORIES OF DEVELOPMENT (10 HOURS)

Classical theory of development, Marx and Schumpeter Approaches to development: Balanced growth, Critical Minimum Effort, Big Push; Unlimited supply of Labour , Unbalanced growth; Low income equilibrium trap.

MODULE – IV: TECHNICAL CHANGE AND STEADY GROWTH (10 HOURS)

Technological progress – embodied and disembodied technical progress; Hicks, Harrod; Labour saving technical change; Capital saving technical change; Basic principles, conditions for steady growth; main properties of steady growth.

MODULE – V: ALLOCATION OF RESOURCES AND PLANNING (10 HOURS)

Need for investment criteria in developing countries – present vs., future, Alternative investment criteria; Cost-benefit analysis, Shadow process, Need for planning – democratic, decentralized and indicative planning, micro-level planning- Review of Indian Plan models. And Role of NITI Aayog in transforming the India

READING LIST:

1. Adelman, I. (1961), Theories of Economic Growth and Development, Stanford University Press, Stanford.

**M.A ECONOMICS
SEMESTER – III
PAPER – II: INDIAN ECONOMY**

Course Name	INDIAN ECONOMY	L	T	P	C	IM	EM	TM
Course Code	EC 3.2 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-InternalMarks, EM-ExternalMarks, TM-TotalMarks

COURSE DESCRIPTION AND PURPOSE:

The successful completion of this course demands students to be in a position to understand the issues and prospects of Indian economy regarding financial efficiency of public sector, WTO and trade from an analytical perspective. More importantly, they should be in a position to articulate their views on the prospects of Indian economy. The outcome is to provide knowledge regarding food security, terms of trade between agricultural and industry, industrial policy, balance of payments and WTO effects on Indian Economy

COURSE OBJECTIVES:

The objective of this paper at the postgraduate level would be to sharpen the analytical faculty of the student, by highlighting an integrated approach to the functioning aspects of the Indian economy. More importantly, the focus is on the contemporary issues and its implications. To develop all these themes, the course is divided into five modules dealing with issues specific to policies – population, poverty, rural-urban disparities, agricultural vs industries, trade et.,

COURSE OUTCOMES:

1. To understand the structure of Indian economy.
2. To examine the role of agriculture in Indian economy.
3. To know the role of industrial sector in Indian economy.
4. To understand the role of service sector in Indian economy.
- 5.. To examine the importance of economic reforms in Indian economy.

**M.A ECONOMICS
SEMESTER – III
PAPER – II: INDIAN ECONOMY**

COURSE CONTENT:-

MODULE – I: PLANNING IN INDIA (10 HOURS)

Objectives and strategy of planning; Failures and achievements of Plans; Developing grass-root organizations for development – Panchayats, NGOs and pressure groups.

MODULE – II: DEMOGRAPHIC FEATURES, POVERTY AND INEQUALITY (10 HOURS)

Broad demographic features of Indian Population; Rural-urban migration; Urbanization and civic amenities; Poverty and Inequality.

MODULE – III: THE AGRICULTURAL SECTOR (10 HOURS)

Institutional Structure – land reforms in India; Technological change in agriculture – pricing of agricultural inputs and output; Terms of trade between agriculture and industry; Agricultural finance policy; Agricultural Marketing and Warehousing; Issues in food security-policies for sustainable agriculture.

MODULE – IV: THE INDUSTRIAL SECTOR (10 HOURS)

Industrial policy; Public Sector enterprises and their performance; Problem of sick units in India; Privatization and disinvestments debate; Growth and pattern of industrialization; Small-scale sector; Productivity in industrial sector; Exit policy – issues in market reforms; Approaches for employment generation.

MODULE – V: ECONOMIC REFORMS (10 HOURS)

Rationale of internal and external reforms; Globalisation of Indian economy; W.T.O. and its impact on the different sectors of the economy; Need for and issues in good governance; issues in competition and safety nets in Indian economy.

PAPER – III: ECONOMICS OF ENVIRONMENT

Course Name	ECONOMICS OF ENVIRONMENT	L	T	P	C	IM	EM	TM
Course Code	EC 3.3 (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

Environmental Economics is primarily concerned with the role of environmental policies of government. Environmental Economics builds on the theory of development and is ultimately used as a tool to improve social welfare. Environmental Economics provides a framework for thinking about whether or not the government should participate in the effect of environmental degradation and to what extent it should do so.

COURSE OBJECTIVES:

- To familiarize the student about the effect of pollution on society
- To understand the Nature and Scope of Environmental Economics
- To understand concepts of Environmental Pollution on Health, Economic and Social Aspects
- To focus on the functional Environmental Laws and Management Strategies.

COURSE OUTCOMES:

At the end of this course the students should be able to:

1. To know the nature and scope of environmental economics.
2. To familiarize the cause and effect of environmental degradation.
3. To understand the effect of pollution on society.
4. To know the environmental policies of government.
5. To examine environmental laws and management strategies.

M.A. ECONOMICS
SEMSTER – III
PAPER – III: ECONOMICS OF ENVIRONMENT

COURSE CONTENT:-

MODULE –I: ENVIRONMENT, ECOLOGY AND ECONOMY: (10 HOURS)

Environment and Economy - Elements of Ecology - Energy Flow and Energy Systems Dynamics - Pollution and Externalities - Market Inefficiency and Externalities - Property Rights and Externalities - Non-Convexities and Externalities - Common Property Rights.

MODULE – II: MEASUREMENT OF ENVIRONMENTAL VALUES: (10 HOURS)

Concept of Total Economic Value - Objective standard based valuation selective preference based valuation - Indirect Methods of Environmental valuation: Travel Cost Method, Hedonic Price Theory - Direct Methods of Environmental Valuation: Contingent Valuation Methods.

MODULE – III: THE THEORY OF ENVIRONMENTAL POLICY: (12 HOURS)

Environmental Externalities - Pigouvian Taxes and Subsidies, Marketable Pollution Permits and Mixed Instruments (the charges and standards approach) - Coase's Bargaining Solution and Collective Action. Informal Regulation and the new model of pollution control. Global environmental Externalities and Climatic Change - Tradable pollution permits and international Carbon Tax.

MODULE – VI: ECONOMICS OF NATURAL RESOURCE MANAGEMENT AND SUSTAINABLE DEVELOPMENT: (10 HOURS)

Theories of optimal use of exhaustible and renewable resources - The concept of sustainable development; Rules of sustainable development-Indicators of sustainable development-Integrated environmental and economic accounting and the measurement of environmentally corrected GDP

MODULE – V: ENVIRONMENTAL LAWS AND MANAGEMENT STRATEGIES IN INDIA (10 HOURS)

Mechanism for environment Regulation in India; Environmental laws and their implementation - Policy instruments for controlling Water and Air Pollution – Forestry Policy. The Environmental Institutions and Grass Root Movements.

SEMESTER – III
PAPER – IV(A): INDIA’S FOREIGN TRADE

(GENERIC ELECTIVE)

Course Name	INDIA’S FOREIGN TRADE	L	T	P	C	IM	EM	TM
Course Code	EC 3.4A (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

This course deals with the theory and practice of India’s Foreign trades and of trade-related policies. It focuses on analyzing the gains from trade, the changing patterns of balance of payment, the income distributional consequences of liberalizing foreign capital, the relationship between trade among the countries, flow of FDIs , and the managements of foreign exchange rate policies which are help to economic growth, and also analyse the world economy and trade policies among the world.

COURSE OBJECTIVES:

This is course which has a combination of both economics and finance. The main objective of this course is to understand the issues relating to international economics such as need for international trade, developments in international economy, evolution of international monetary system and macroeconomics of an open economy. On the international finance side, we have topics such as exchange rates, interest and inflation rates and their relation to each other.

COURSE OUTCOMES:

A student after completing this course, would be in a better position to understand the issues relating to international economics and finance. This is a unique course, since it gels these two aspects. Apart from understanding the importance of trade, we could also see how any economy would frame its policies in an open economy framework. One would also be in sound position to understand the dynamics of exchange rates.

M.A., ECONOMICS
SEMESTER – III
PAPER – IV(A): INDIA’S FOREIGN TRADE

(GENERIC ELECTIVE)

CORSE CONTENT:-

MODULE –I: INDIA’S FOREIGN TRADE (10 HOURS)

Introduction – Trends at Exports and Imports in India – Components of Foreign Trade – Growth and Structure of India’s Foreign Trade since 1991 – New Trade Policy – Impact of Trade Reforms since 1991.

MODULE –II: INDIA’S BALANCE OF PAYMENTS (10 HOURS)

India’s Problems of Balance of Payments: The pre-1991 period – Balance of Payments studies since 1991 – Solutions to Balance of Payments Problem.

MODULE – III: FOREIGN CAPITAL (10 HOURS)

Need for Foreign Capital – India’s Policy towards Foreign Capital – Foreign Direct Investment (FDI) – FDI vs. Exports – Foreign Aid to India.

MODULE – IV: INDIA’S FOREIGN EXCHANGE RATE POLICY (10 HOURS)

Choice of Foreign Exchange Rate Regime – Exchange Rate Management in India: Par Value System, Pegged Regime, The Period since 1991 – The Management of Foreign Exchange Resources.

MODULE – V: WORLD ECONOMY (10 HOURS)

Types of Trade Blocks- Globalization Strategy – New International Order – Globalization and Technology Transfer – TRIPs and TRIMs – India and WTO.

READING LIST:

M.A., ECONOMICS
SEMESTER – III
PAPER – IV(B): RURAL DEVELOPMENT

(GENERIC ELECTIVE)

Course Name	RURAL DEVELOPMENT	L	T	P	C	IM	EM	TM
Course Code	EC 3.4B (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

The course curriculum provides a multidisciplinary knowledge and skills focusing on both theoretical and practical approach of rural development. The student will be given hands on field experience to know the reality and to motivate them to commit for the rural development either in teaching and research or as practitioners in the organization/institution involves in the process of rural transformation.

COURSE OBJECTIVES:

- To understand the basic concepts of rural development and new agricultural strategies
- To learn the concept of sustainable development
- To learn about various rural development programmes run by state as well as central government
- To enable the students to understand the concepts, the theories and the problems of rural development and
- To analyse the pattern of economic diversification in rural areas and to examine the role of infrastructure in rural development.
- To learn the basics of rural credits and the rural market strategies

COURSE OUTCOMES:

This course provides the students with the basics of rural development, including concepts, characteristics, problems, theories and approaches and programmes implemented for rural redevelopment in India. It also enables the students to study the various aspects of poverty and unemployment in India, transferring the rural economy-economic diversification in rural areas and the role of infrastructures in rural development. At the end of the course, the students will be able to understand the problems, approaches, programmes implemented for the development of rural economy in India and understand the essentiality to design the new policies and programmes for sustainable development of rural economy in India.

SEMESTER – III
PAPER – IV(C) – DEMOGRAPHY**

(GENERIC ELECTIVE)

Course Name	DEMOGRAPHY	L	T	P	C	IM	EM	TM
Course Code	EC 3.4C (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

The main objective of this paper is to make the students aware of the importance of population in economic development and the various theories that explain the growth of population in a country. In recent times, gender characteristics of the population have acquired importance and these have also been included in the framework of study. This paper will focus on gender characteristics; migration, urbanization are important structural change taking place in a society.

COURSE OBJECTIVES:

1. To describe the meaning of demography and demographic profile of India
2. To describe the population trends in India.
3. To describe the importance of fertility and nuptiality in demography.
4. To understand the concept of mortality.
5. To understanding the demographic issues of India.

COURSE OUTCOMES:

The paper enlightens the student on the qualitative aspects and characteristics of the population through various demographic techniques. The paper exposes the students to sources of population and related characteristics as also to the rationale, need and evolution of population policy. Students will be able to appreciate the dynamics of change.

M.A., ECONOMICS
SEMESTER – III
PAPER – IV(C) : DEMOGRAPHY
(GENERIC ELECTIVE)

COURSE CONTENT:-

MODULE –I: NATURE AND SCOPE OF DEMOGRAPHY (10 HOURS)

Definition, Nature and Scope of Demography – Demographic Thoughts – Demographic Analysis – Direct and Indirect methods of data collection –Theories of Population – Adam Smith, J.S.Mill, Malthus, Marx, Meade and Keynes – Optimum Population.

MODULE –II: COMPOSITION AND DISTRIBUTION OF POPULATION IN INDIA (10 HOURS)

Decennial growth of Population and Stages of Demographic Transition in India- Crude Birth Rate and Death Rates – Migration, industrialisation and Urbanisation as Determinants of population growth – sex and age-wise distribution of population – Rural and Urban population growth – Religion and Caste-wise growth of Population – Trends in population density.

MODULE -III: FERTILITY, MORTALITY AND MIGRATION IN INDIA (10 HOURS)

Size of the family- Urban and Rural differentials- Social, cultural and psychological factors affecting fertility – Achievements in Total Fertility Rates - Causes and Indicators of Mortality – Relation between age, sex, marital status, education and migration in India.

MODULE – IV: QUALITY OF POPULATION IN INDIA (10 HOURS)

Determinants of Quality of Population in India – Structural changes in Population – Demographic dividend - Trends in Life Expectancy at Birth and Gender differentials – Trends in Achieving Literacy Rates- Gender dimension of Literacy rates – Trends in Workforce and Labour force Participation Rates- Sectoral Employment of workers – Formal and Informal Sectors - Need for Skill Development.

MODULE–V:GOVERNMENT INITIATIVES AND POPULATION POLICIES IN INDIA (10 HOURS)

Need for Population Control and Stabilization – Strategies to achieve Population stabilization – Role and progress of Family Planning Programme – Two-child Policy — Highlights of National Population Policy- 2000 – JananiSurakshaYojana -2005 – Role of Accredited Social Health Activists (ASHA) –SANTUSHTI AND PRERANA Strategies –Rashtriya Kishore SwasthyaKaryakram - 2014- Population Projections- 2016 and 2026.

PAPER – IV(D): HUMAN RESOURCE DEVELOPEMNT
(GENERIC ELECTIVE)

Course Name	HUMAN RESOURCE DEVELOPEMNT	L	T	P	C	IM	EM	TM
Course Code	EC 3.4D (NR)	4	0	0	4	30	70	100

L-Lecture, T-Tutorial, P-Practical, C-Credits, IM-Internal Marks, EM-External Marks, TM-Total Marks

COURSE DESCRIPTION AND PURPOSE:

The course enables students to understand Talent Management practices in India and Global level. The course consist of SHRM competencies of Business Acumen, Communication, Consultation, Critical Evaluation, Ethical Practice, Global and Cultural Effectiveness, Leadership and Navigation Relationship Management. This course, thus inculcates design thinking skills to successfully manage the employee experience at workplace. The course provides a strong link between data and the business decision making process. The course content will develop analytical skills among future human resource professionals in order to attract, manage, and retain employees.

COURSE OBJECTIVES:

- The objective of the course is to make student aware of the concepts, techniques and practices of human resource development.
- This course is intended to make students capable of applying the principles and techniques as professionals for developing human resources in an organization.

COURSE OUTCOMES:

- ❖ At the end of the course, the students will be able to learn behavioural factors in HRD, importance of Management development, global development and research on HRD
- ❖ This course outline is relevant for M.A. Economics students with a concentration or emphasis in HRM. The SHRM competencies will be discussed for analytics, metrics and problem-solving in HRM.

The main objective of this course is to give an overview about labour supply, labour demand, labour market equilibrium, employment and unemployment, investment in education and characteristics of labour market in India.

COURSE OUTCOMES:

1. To know the composition of labour markets.
2. To describe the different theories of wage determination.
3. To understand the wage policy in India.
4. To formalize the nature and scope of Industrial Relations in India.
5. To understand the various labour welfare measures in India.

M.A., ECONOMICS
SEMESTER – IV
PAPER – (IV)D: LABOUR ECONOMICS

(GENERIC ELECTIVE)

COURSE CONTENT:-

MODULE – I: LABOUR ECONOMICS AND LABOUR PROBLEMS (10 HOURS)

Definition, Nature, Scope, and Importance of Labour Economics, Nature and Problems of Labour, Labour Market and Analysis of Labour Demand and Supply; Labour Market in India

MODULE – II: EMPLOYMENT (10 HOURS)

Employment and Development relationship – Poverty and Unemployment in Developing Countries; Unemployment – Concept, Types and Measurement particularly in India.

MODULE – III: WAGE DETERMINATION (10 HOURS)

Formal & informal; Wages: Concept and types; Theories of wage determination: Classical, Neoclassical and bargaining theories; concept of minimum wage; Living wage and fair wage; Wage determination in – organised-unorganised sector; Non-wage component of labour remuneration; exploitation and wage differential; Evolution and features of wage policy in India.

MODULE – IV: INDUSTRIAL RELATIONS (10 HOURS)

Concept of Industrial relations; Trade Union: Meaning and Objectives; Trade Union movement in India, Measures to Strengthen the Trade Union Movement in India. Achievements of labour unions; Industrial disputes: Meaning, Causes and Effects of Industrial disputes; Prevention of Industrial disputes and Settlement of disputes with reference to India. Labour, Legislation in India.

MODULE – V: STATE AND LABOUR (10 HOURS)

Concept of Social Security and its evolution; Social Assistance and Social Insurance; State policies with respect to Social Security and Labour Welfare in India; Special Problems- Child labour, discrimination, bonded labour, Labour market Reforms- Exit Policy, safety requirements, National Commission on Labour, Globalisation and labour markets, mobility of labour

READING LIST:

1. Goyal, Sunil & Goyal, M.L.(2008): Labour Economics, R.B.S.A. Publications, Jaipur.
2. Saxsena, R.C.(2010): Labour Problems & Social Welfare, K. Nath and Company Publication, Meerut.
3. Singh, Dilip Kumar,(2008): Workers Participation in Management and Industrial Relation, Rawat Publication, Jaipur & Delhi.
4. Singh, Usha & Singh, H.P.(2011): Child Labour in India :Problem and Solutions, Classical Publication ,New Delhi
5. Gupta, P.K.: labour economics , Vrinda publications

16. Card, D., and Ashenfelter, O. (2011): Handbook of Labor Economics, Vol 4A &B, Elsevier Articles from journals and working papers.

M.A. ECONOMICS
SEMESTER – IV
PROJECT WORK
Course Code: EC 4.5 (NR)
(Revised Syllabus with effect from 2023-24)

EC 4.5: PROJECT WORK

Project work/ Dissertation work involving application of knowledge in solving/ analyzing/exploring a real life situation/ difficult problem. A project/ dissertation work may be hard core or a soft core as decided by the concerned Board of Studies (BoS)

Preamble: It is desirable for the students of Economics to undertake Project Work since it would be useful for Project Work or for pursuing M.Phil., or Ph.D., Research or for skill based professions.

Course Outcomes: Through this course students should be able to

- Provide hands on experience, knowledge and exposure to work on real life projects.
- apply the knowledge and skills gained during degree program to generate new knowledge.
- integrate theory and practice at the work place.
- integrate the gained exposure and the responsibility for varied practical situations under qualified supervision.
- solve problems related to a substantive area of the study using rigorous methods.
- develop work habits and attitude necessary for job success.
- demonstrate through actions a level of competence in leadership and administrative abilities, as well as a commitment to human values and ethics.
- integrate gained knowledge and competence in working with individuals and groups in a structured program setting.

Project Work

The objective of the project is to train the students to undertake empirical studies applying their knowledge in economic theory and methods and provide scope to do empirical analysis. The students are expected to demonstrate the practical implementation of the economic theory to an economic problem. The project would enable them to learn the applications of the statistical tools and techniques of preparing project reports.

The project report may be 50-100 pages and consists of the statement of the problem, review of literature, theoretical and empirical methodology, sources and nature of data and tools and methods of analysis, economic/statistical inferences, conclusions and references.

Faculty members will provide continuous guidance to complete the project. The topic of the research will be chosen by the students in consultation with one of the faculty members of the Department who will act as guide and supervisor. The candidates should also present their project work in the seminar before the Department faculty which will evaluate the project work.

Instructions:

1. **Project Work** with 4 Credits is pursued by the Students during the Fourth Semester.
2. Faculty who are involved in guiding students who pursue Project Work during the Fourth Semester shall have 4 hours **Work Load** per week for a minimum of 6-8 students.

3. Project Work to be submitted by the students during the end of fourth semester could generally be related to the topics from Core Courses/Mandatory Soft Core/Specialization Elective Course/ Papers pursued by the student or could be based on the latest developments or current issues in Economics.
4. Project Work can either be selected by the student or suggested by the Faculty at the end of III Semester or beginning of IV Semester.
5. **Submission of Project Work** by the Students to the Department shall be before the end of IV Semester [i.e., on or before the last working day of the Semester].
6. **Marks for the Project Work:** 70+30 = 100 Marks.
7. **Break-up of Marks** for the Project Work is as follows:

Component-1: (C1) : Dissertation/Project Work Evaluation	[70 Marks]
Component-2: (C2): Viva Voce Examination	[30 Marks]
8. **Project Work Format** : Font Style: Times New Roman;
: Font Size: 12;
: Line Spacing: 1.5;
: Number of Pages: Minimum 100 and Maximum 150 Pages.

MODEL QUESTION PAPERS

M.A., DEGREE EXAMINATION, 2023

ECONOMICS

(Under CBCS Revised syllabus from 2023-24)

MODEL PAPER
M.A., DEGREE EXAMINATION
FIRST SEMESTER
ECONOMICS
EC 1.1 (NR) :: PAPER – I: MICRO ECONOMIC ANALYSIS
(Under CBCS Revised syllabus with effect from 2023-24)

Time: 3 hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

1.
 - a) What is Giffen Paradox
 - b) Properties of Indifference curves
 - c) Marginal Rate of substitution
 - d) What is opportunity cost
 - e) Monopolistic competition
 - f) Features of Isoquant
 - g) Distinguish Marginal cost and Average cost
 - h) Price discrimination

Section-B

Answer ALL questions

(5x10=50)

2. a) “Scarcity and Choice one basic economic problems” Discuss
Or
b) Explain the deductive and inductive method of Economic analysis
3. a) Examine Hicks revision of demand theory and its usefulness
Or
b) Analyse how revealed preference theory is better than indifference curve analysis.
4. a) What is linier programming? Explain the liner programming method and its limitation
Or
b) Explain the CES production function and its advantages
5. a) Discuss the nature and shape of short run and long run cost curves and their inter-relationships
Or
b) Examine the Marries model of marginal enterprise
6. a) What is discrimination monopoly? Explain the condition when it is possible and profitable?
Or
b. Explain the special features of oligopoly market and examine the kinked demand curve and model of oligopoly

MODEL PAPER
M.A., DEGREE EXAMINATION
FIRST SEMESTER
ECONOMICS
EC 1.2 (NR) :: PAPER – II: MACRO ECONOMIC ANALYSIS
(Under CBCS Revised syllabus with effect from 2023-24)

Time: 3 hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

1.
 - a) Differentiate leakages and injections in a circular flow of income
 - b) Differentiate base year and current year
 - c) Compare the concepts of Factor income and Transfer income
 - d) Explain Relationship between MPC and multiplier
 - e) Explain Retched effect/ Bandwagon effect
 - f) Define Induced investment
 - g) Define Transitory Inflation
 - h) Briefly explain Phases of business cycle

Section-B

Answer ALL questions

(5x10=50)

2. a) Illustrate the circular flow of income in three sector model
Or
b) Elucidate GDP deflator and its role
3. a) Explain Keynes Psychological law of consumption
Or
b) Explain Permanent Income Hypothesis
4. a) Explain acceleration theory of Investment and determinants of investment
Or
b) Critically examine the factors that determine Marginal Efficiency of Capital
5. a) Briefly explain the factors behind the Cost-push and Demand pull inflations
Or
b) Discuss about the different issues regarding the Natural Rate of unemployment hypothesis
6. a) Write about innovation theory of business cycle
Or
b) Write about Samuelsson theory of business cycle

MODEL PAPER
M.A., DEGREE EXAMINATION
FIRST SEMESTER
ECONOMICS
EC 1.3 (NR) :: PAPER – III: PUBLIC ECONOMICS
(Under CBCS Revised syllabus with effect from 2023-24)

Time: 3 Hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

1 .

- a) Deference between public finance and private finance
- b) Redemption of public debt
- c) What is a mixed economy?
- d) Finance commissions
- e) Income Tax
- f) What is the concept of fiscal policy?
- g) Cannons of Taxation
- h) Classification of public Expenditure

Section- B

Answer ALL the questions

(5X10=50)

2. a) Explain the principle of maximum social advantage theory?

Or

b) What Is The Public Finance Explain The Importance To The Modern World

3. a) Discuss the significance of public sector in a mixed economy?

Or

b) What are the reasons for increase in state expenditure in recent times?

4. a) Define public debt? Analyse the reasons increasing public debt in India?

Or

b) Write about the theory of incidence and the alternative concepts of incidence?

5. a) Briefly explain the Wagner's law of increasing state activities?

Or

b) discuss the merits and demerits of direct and indirect taxes

6. a) Briefly explain the Theory of measurement of dead weight losses?

Or

b) Discuss the objectives of fiscal policy in a developing country?

MODEL PAPER
M.A., DEGREE EXAMINATION
FIRST SEMESTER
ECONOMICS

EC 1.4 (NR) :: PAPER-IV: MATHEMATICAL METHODS IN ECONOMICS
(Under CBCS Revised syllabus with effect from 2023-24)

Time: 3 Hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

1. a) Explain the concept of functions.
- b) Distinguish between a Relation and a Function with an example.
- c) Find a straight line passing to the X – axis and passing through (-5, -7) .
- d) Define the derivative of a function and write down the Product and Quotient Rules of differentiation.
- e) Find the derivatives of $7x^4 + 3x^3 - 9x + 5$
- f) Discuss the rules of integral.
- g) Given the marginal cost curve $MC = 3-2x-x^2$, find the total cost curve.
- h) Explain the types of Matrix.

Section- B

Answer ALL the questions

(5X10=50)

2. a) If $F(X) = 3x^2 - 2x^2 - 1 \div x - 1$, values should be assigned to $f(1)$ so that $f(x)$ is continuous at $x=1$

Or

- b). Evaluate the $\lim_{x \rightarrow 2} \frac{2x^2 - 7x + 6}{5x^2 - 11x + 2}$

3. a) Explain the concepts of different types of functions and their applications in economics.

Or

- b) given the demand function $P + \frac{1}{200}x = 50$
 - i. Find the elasticity of demand in terms of p.
 - ii. what is the elasticity of demand when $p=25$

4. a) State the conditions for maxima and minima of the function $y = f(x)$ and find them for the function $y = x^3 - 3x^2 - 9x + 27$.

Or

- b) ASr and Mr be the average and marginal revenue at any output shows that $e_d = \frac{AR}{AR-MR}$ and verify the relationship between elasticity of demand , average revenue and marginal revenue

5. a) Determine consumer and producer surplus under perfect competition for the demand function is $p= 36-x^2$ and supply function is $p= 6 + \frac{x^2}{4}$ where p is price and x is quantity

Or

- b) The marginal cost function of manufacturing x shoes is $6 + 10x - 6x^2$. The total cost of producing a pair of shoes is Rs.12. find the total and average cost function

6. a) Solve the following system of equations by Cramer's Rule:

$$\begin{aligned} 2x-4y+3z &= 3 \\ 4x-6y+5z &= 2 \\ -2x+y-z &= 1 \end{aligned}$$

Or

- b) Solve the following LPP by graphical method

$$\begin{aligned} \text{Min. } Z &= 4x + 2y \\ \text{Subject to } 10x + 2y &\geq 20 \\ 5x + 3y &\geq 15 \text{ and } x, y \geq 0 \end{aligned}$$

MODEL PAPER
M.A., DEGREE EXAMINATION
FIRST SEMESTER
ECONOMICS
EC 1.5 (NR) :: PAPER –V: FUNDAENTALS OF COMPUTERS
(Under CBCS Revised syllabus with effect from 2023-24)

Time: 3 hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

1.

- a) Hardware, Software and Firmware
- b) Distinguish system software and application software
- c) Explain Semiconductor memory devices
- d) Features of Windows Explore
- e) How to calculate trend line in Excel
- f) Mail merge
- g) How to run a macro
- h) How to calculate descriptive statistics in SPSS

Section-B

Answer ALL questions

(5x10=50)

2. a) What are the elements (components) of a digital computer system and write about CPU and its functions the elements (components) of a digital computer system

Or

- b) Explain different types of Memory devices in a digital computer system

3. a) What are the features of Windows operating system and merits of Windows operating system

Or

- b) Explain the Role of Microsoft Word and explain the process of documentation.

4. a) What are the characteristics of MS Excel? Explain data entry, file handling and operation.

Or

- b) How to create Tables, Graphs and Charts in Excel.

5. a) Explain Salient features of Internet and list out different types of browsers

Or

- b) How to create e-mail, features of inbox, how to attach and download files from e-mail to computer

6. a) How you calculate Regression by using SPSS, how SPSS is useful in economic analysis.

Or

- b) How to enter data and coding and Recoding Variables in SPSS

**EC 1.6 (NR) :: PAPER: VI: PERSONALITY DEVELOPMENT THROUGH LIFE
ENLIGHTENMENT SKILLS
(Under CBCS Revised syllabus with effect from 2023-24)**

Time: 3 Hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

1.
 - a) Concept of personality
 - b) Concept of motivation
 - c) Importance of self- motivation
 - d) Low self- esteem
 - e) Decision-making skills
 - f) Time management
 - g) Resume building
 - h) Mock Interview Sessions

Section-B

Answer ALL questions

(5X10=50)

2.
 - a) Write about the Dimensions of personality development?
Or
 - b) Explain the concept of success and failure?
3.
 - a) Explain the Differences between personalities having positive and negative attitude?
Or
 - b) Examine the Internal and external motives?
4.
 - a) Explain the Positive and negative self esteem?
Or
 - b) Discuss the difference between aggressive, submissive and assertive behaviors?
5.
 - a) Write about the Leadership and qualities of a successful leader?
Or
 - b) Examine the Conflict and Stress Management?
6.
 - a) Explain the art of participating in Group Discussion?
Or
 - b) Discuss the Facing the Personal (HR & Technical) Interview?

EC 2.1 (NR) :: PAPER – I: THEORY OF DISTRIBUTION AND WELFARE ECONOMICS
(Under CBCS Revised syllabus with effect from 2023-24)

Time: 3 hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

1.
 - a) Marginal Productivity theory
 - b) theories of distribution Ricardian
 - c) Theory of distribution in imperfect
 - d) Benthamite Approach to Aggregate Welfare
 - e) Optimum Resource Allocation
 - f) The Walrasian General Equilibrium Model
 - g) Pigo's ideal output.
 - h) The Theory of second best

Section-B

Answer All questions

(5X10=50)

2. a) Critically Explain the Recardian Theory Of Distrubution
Or
b) explain the importance of product exhaustaion theorem
3. a) discuss the nature and scope of welfare economics
Or
b) Explain the role of value judgements in welfare economics and mention the difficulties that ariase in making value judgements
4. a) Explain the graphic treatment of general equilibrium model and its explain its importance
Or
b) describe the stability and uniqueness of general equilibrium
5. a) Briefly explain the pigovian - welfare economics
Or
b) what do you mean externalities? Discuss the externalities between private costs and return
6. a) Write about elucidate the theory of second best
Or
b) Discuss about factor stabilization and degree of specialisation

Section-A

Answer any FIVE questions

(5X4=20)

1.
 - a) Monetary aggregates and money supply in India
 - b) Briefly explain the concept of 'Money Multiplier'
 - c) Explain the components of 'Narrow money'
 - d) Explain Speculative Demand for money
 - e) Inventory approach to transaction balances
 - f) Impact of 'Excess reserves' on the Economy
 - g) State the term 'Liquidity Adjustment Facility' and its role
 - h) Define 'Policy rate' and 'Bank rate'

Section-B

Answer ALL questions

(5X10=50)

2. a) What are the Determinants of money supply
Or
b) Briefly explain the concept of Money Multiplier
3. a) Briefly outline the Keynes theory of demand for money
Or
b) Explain Friedman's Restatement of quantity theory of demand for money
4. a) Conditions for Product Market Equilibrium and derive IS Curve
Or
b) Simultaneous Equilibrium in Product and Money Market
5. a) Explain different components of monetary policy framework.
Or
b) Examine Privatization and Merger of Commercial Banks in India
6. a) Review the banking sector reforms in India
Or
b) Explain the major recommendations of Narasimham committee report -II

(5X4=20)

1.
 - a) Budget
 - b) Balanced budget
 - c) Plan expenditure
 - d) Finance commissions
 - e) Resource mobilization
 - f) What is the CAG
 - g) Sarkaria Commission
 - h) Union Finance Ministry

Section- B

Answer ALL questions

(5X10=50)

2. a) Explain the preparation of Central Budget in India?
Or
b) Discuss the effect of budget on economic development in India
3. a) Discuss about the Central-State financial relations?
Or
b) Role of the finance commissions in Indian economic development?
4. a) Briefly explain the Major Recommendations of 14th Finance Commission ?
Or
b) Write about the theory of incidence and the alternative concepts of incidence?
5. a) Briefly explain the nature, purpose and objectives of government accounting and Audit?
Or
b) Explain the functions of comptroller and auditor general of India
6. a) Describe the union finance ministry structure, functions and role in India?
Or
b) Discuss the fiscal policy in India and impact of fiscal reforms on economic Development?

EC 2.4 (NR) :: PAPER –IV: INTERNATIONAL TRADE - THEORY AND POLICY
(Under CBCS Revised syllabus with effect from 2023-24)

Time: 3 Hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

- 1.
- a) Silent Features of International Trade
 - b) Concepts of Terms of Trade
 - c) Components of Balance of Payments
 - d) Flexible exchange rates.
 - e) International Finance Corporation
 - f) Working and Regulations of MNCs in India
 - g) Comparative Advantage
 - h) BIMSTEC

Section-B

Answer ALL questions

(5X10=50)

2. a) Explain the silent Features of International Trade
Or
b) Examine the Meaning and Importance of International Trade
3. a) Explain the different concept of terms of trade.
Or
b) What are the gains from international trade? How do you measure them
4. a) Explain the effects of a quotas on National Income and Employment
Or
b) Analyse the Tariffs and quotas impact on National Income
5. a) Examine the different aspects relating to the concept Foreign Trade Multiplier
Or
b) Explain how devaluation helps in correcting disequilibrium in the Balance of Payment of a Country
6. a) Examine the role of International monetary Fund in promoting world trade
Or
b) Functions of the International Development Association (IDA)

MODEL PAPER

SECOND SEMESTER
ECONOMICS
EC 2.5 (NR) :: PAPER –V: STATISTICAL METHODS IN ECONOMICS
(Under CBCS Revised syllabus with effect from 2023-24)

Time: 3 Hours

Max. Marks: 70

Section-A

Answer any FIVE questions

(5X4=20)

- 1 a). What is sampling? Give its objects and name the laws which form the basis of sampling.
- b) Explain the types of Correlation
- c) Distinguish between Correlation and Regression
- d) Explain the components of time series
- e) Explain the concept of Type – I Error and Type – II Error.
- f) Explain the features of Chi-square distribution
- g) Explain the characteristics of Binomial distribution.
- h) Explain the addition theorem of Probability

Section- B

Answer ALL questions

(5X10=50)

2. a) Briefly explain non probability sampling methods with their examples

Or

- b) Briefly explain probability sampling methods with their examples

- 3.. a) find the two regression lines from the following data

X	16	21	26	23	28	24	17	22	21
Y	33	38	50	39	52	47	35	43	41

Or

- b) Find the correlation coefficient from the following data

X	11	19	7	12	13	10	16	22	14	16
Y	6	4	8	.3	7	8	3	2	5	4

4. a) Calculate trend values by 3- yearly moving averages from the following data and plot the trend lines in a graph

Years	2015	2016	2017	2018	2019	2020	2021
Sales (in millions Rs.)	41.2	43.8	44.6	45.4	47.0	48.3	49.0

Or

- b) Fit a straight line trend by the method of least squares to the following data

Years	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
Production of Led TVs (in 000)	17	20	19	23	24	40	35	55	50	74	69

- 5 .a) State and prove the Bayes theorem

Or

- b) In a family of 6 children, what is the probability of having

- i. All daughters
- ii. All sons
- iii. At least one son
- iv. At least one daughters

6. a). Define the Poisson distribution. State its properties

Or

- b). Data on the marital status for men and women ages 20 to 29 were obtained as a part of a national survey. Using $\alpha = 0.01$ test for independence between marital status and gender

Section-A

Answer any FIVE questions

(5X4=20)

1.
 - a) Roman Empire and Christianity
 - b) Thoughts of classical economist
 - c) Jevons theory
 - d) Analyze the Malthus's theory of population?
 - e) Discuss the Sismondi theory of gults?
 - f) What are the economic ideas of Modern Schools?
 - g) Economic ideas of Marshall.
 - h) Contributions of Amartya Sen

Section-B

Answer ALL questions

(5X10=50)

2.
 - a) Analyze the expansion of mercantilism and the related rivalries

Or

 - b) Analyze the concept of the natural order
3.
 - a) Elaborate upon the criticism of the Ricardian theory of rent

Or

 - b) Discuss any two influences that shaped Smith's thoughts
4.
 - a) Examine the importance of the economic theories contributed by J.S. Mill

Or

 - b) Discuss about the Karl Marx's theory of Surplus Value?
5.
 - a) Why did Ranade believe railways to be good for India

Or

 - b) Assess the importance of Veblen's theory Institutionalism
6.
 - a) Examine the contribution made by Dr. Ambedkar,

Or

 - b) Write about the relevance of the Gandhiji's ideas of sarvodaya and Antyodaya

Answer any FIVE questions

(5X4=20)

1. a) Define Economic Growth and distinguish it from Economic Development
- b) Explain Vicious circles of Poverty
- c) What are the assumptions of Adam Smith's model of growth?
- d) Explain the golden age of Mrs Joan Robinson's growth model
- e) Explain the concept of surplus of labour
- f) Explain the assumptions of Balanced growth theory
- g) Explain the properties of Steady Growth
- h) Explain the Indicative plans

Section- B

Answer ALL the questions

(5X10=50)

2. a) Write about the importance of Government and markets in the economics system?
Or
b) Exam in the modern concepts relating to the measurement of economic development.
3. a) Analyze the basic features of Neoclassical growth models.
Or
b) Assess the growth model which had given importance to instability of equilibrium.
4. a) Briefly outline the approaches of Karl Marx and Schumpeter relating to economic growth
Or
b) Critically analyze the issues relating to low income equilibrium trap.
5. a) Outline the issue relating labour saving and capital saving technical changes.
Or
b) Briefly assess the basic principles and conditions for study growth.
6. a) Examine the need for investment criteria in developing countries.
Or
b) Briefly review the plan model implemented in different five year plans in India

(5X4=20)

1. a) Population
- b) Mass poverty unemployment and its effects
- c) Major controversies on planning in India
- d) Shortfalls of different plans
- e) Food security
- f) Agricultural finance policy
- g) Industrial policy
- h) Foreign Trade

Section-B

Answer ALL questions

(5X10=50)

2. a) Discuss the main features of geographic size-Endowment of natural resources?
Or
 b) Explain the economic effect of population procedure inequalities?
3. a) Explain the economic planning in India?
Or
 b) Examine the industrial trade and agricultural policies?
4. a) Explain the terms of trade between agriculture and industry?
Or
 b) Discuss the Issues in food security-policies for sustainable agriculture?
5. a) Write about the Public Sector enterprises and their performance?
Or
 b) Examine the Exit policy – issues in market reforms?
6. a) Explain the Rationale of internal and external reforms?
Or
 b) Discuss the W.T.O. and its impact on the different sectors of the economy?
